

Come on By!

General Admission

The Space Station Museum is a great place to stop and learn about the exciting history and future of space exploration. Many of our artifacts can be touched and handle, giving our visitors a tactile, hands-on experience you cannot get in other museums. We also rotate our exhibits periodically so that each time you visit you may see something new!

Events

The Space Station Museum has events year round, including our annual Space Festival in the summer and our telescope nights.

Telescope nights are held periodically outside the museum. The viewings begin around 8pm (subject to weather) and guests are invited to view the night sky with our astronomy experts.

One of our newest exhibit pieces—a 90% scale model of the Lunar Excursion Module (LEM)!

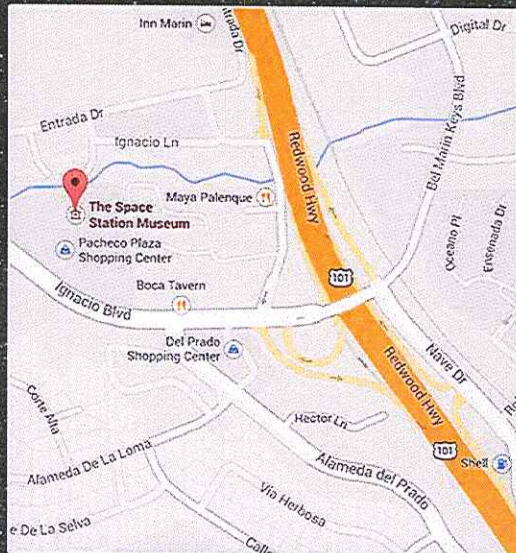

Free Admission and Parking

Hours:

Friday 5pm - 8pm

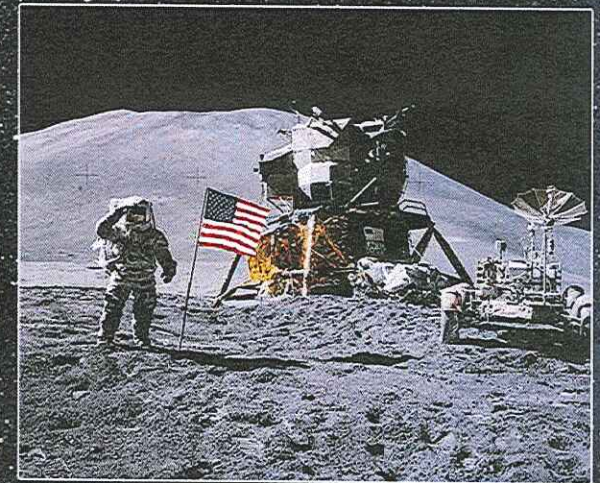

Saturday & Sundays 12 - 4pm

Other dates and times are available by appointment.
